

I'm a truck driver. Satellite Radio and it's traffic and weather channels are a plus and a "must" in my line of work. I can avoid long delays and accidents by re-routing. I can also avoid weather that can have a major impact on my driving safely, by hearing about it on my satillite radio. My regular radio does not work all the time, especially in hilly country. Please reject NAB's petition 04-160. Don't put us out there on the highway, blind to the dangers ahead of us, when with Satillite Radio, with their weather and traffic reports, we can be cautious instead.

Thank you,

Lynn Hall
